HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable APIs and microservices using **Java Spring Boot**, focusing on robust error handling and efficient data exchange.
- Developed and maintained complex data models and service architectures, including internal **MCP servers** that expose tools and data to AI systems, ensuring seamless interoperability.
- Guided the technical direction and implementation of features spanning backend microservices (**Python, Java**) and frontend interfaces (**React**), ensuring alignment with long-term vision.
- Drove features through their full lifecycle, from concept and design through deployment and operational excellence, collaborating with product managers to inform roadmap priorities.
- Applied and raised engineering best practices across the full stack, including frontend architecture, API design, and comprehensive **testing strategies** that improved code quality.
- Mentored and shared knowledge with colleagues across both frontend and backend disciplines, contributing to a collaborative and high-performing team environment.
- Containerized microservices using **Docker** and deployed them to a **Kubernetes** cluster on **AWS**, managing configurations and resource allocation for predictable rollouts.

SKILLS

Backend – Python, Java, Rust, Spring Boot, REST APIs, Microservices, MCP Servers

Frontend – React, Vue, TypeScript, Server-Rendered Templates

Databases – PostgreSQL, MySQL, Oracle, Relational Databases, Non-Relational Databases

Cloud & DevOps – AWS, Docker, Kubernetes, Jenkins, Git, CI/CD

AI/ML – AI Systems, System Interoperability, Observability, Monitoring, Site Reliability Practices

PROJECTS

Internal AI Tooling Integration Platform

- Engineered a Python-based backend service to integrate internal tools and data, exposing them via REST APIs for consumption by AI systems, including **MCP servers**.
- Designed and implemented robust data models within a **PostgreSQL** database to support the storage and retrieval of diverse datasets for AI processing.
- Developed comprehensive unit and integration tests for the platform services, achieving over 85% code coverage and ensuring high reliability for critical AI workflows.

Employee Productivity Web Application

- Developed a **React** frontend for an employee engagement web application, focusing on creating intuitive and user-centered experiences.
- Collaborated with stakeholders to gather requirements and translate them into technical specifications for new features, ensuring alignment with user needs.
- Implemented API integrations with existing backend services using **Java Spring Boot**, facilitating seamless data flow and enhancing application functionality.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
