HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and deployed **Java Spring Boot** microservices to **AWS EC2** instances using **Docker** containers, managing environment variables and network configurations for seamless integration within the cloud infrastructure.
- Developed and maintained **REST APIs** using **Java Spring Boot**, ensuring robust error handling and efficient data exchange for internal enterprise systems, supporting cross-system integrations.
- Implemented data validation and transformation logic using **Python** scripts, automating ETL processes for scheduled reporting and data ingestion into enterprise databases, reducing manual effort by approximately **40%**.
- Supported and troubleshot production incidents for enterprise applications on **Linux** environments, analyzing logs in **Splunk** and **Dynatrace** to resolve P1/P2 issues within strict SLA targets.
- Collaborated with operations teams to gather requirements and support User Acceptance Testing (UAT) for system configuration changes, ensuring smooth deployment and post-go-live stability across interconnected platforms.
- Designed and implemented semi-automated fixturing solutions for manufacturing test stations, integrating **Python** scripting for control logic and data acquisition, improving test cycle times by **15%**.
- Participated in Agile ceremonies and code reviews, contributing to sprint planning and technical estimations, mentoring junior engineers on best practices for **Java** development and system design.

SKILLS

Programming Languages – Java, Python, SQL, R, TypeScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Power BI, Tableau, Splunk, Dynatrace, Jira, Confluence, SAP

Methodologies & Concepts – Agile, Scrum, CI/CD, REST APIs, Data Analytics, Machine Learning, Manufacturing Engineering, Process Improvement, Lean Manufacturing

PROJECTS

Automated Manufacturing Fixture Control System

- Developed a **Python**-based control system for a semi-automated manufacturing fixture, integrating sensor data and actuator commands for precise component alignment.
- Designed a **REST API** interface using **Flask** to allow remote monitoring and control of the fixture, facilitating integration with higher-level production management software.
- Implemented logging and error reporting mechanisms in **Python**, capturing operational data and diagnostic information to aid in troubleshooting and performance analysis, reducing investigation time by **~30%**.

Data Pipeline for Production Yield Analysis

- Engineered a data pipeline using **Python** and **SQL** to extract, transform, and load manufacturing data from disparate sources into a centralized data warehouse.
- Developed **Power BI** dashboards to visualize key production yield metrics, defect rates, and process deviations, providing actionable insights to operations and engineering teams.
- Applied statistical methods in **R** to analyze yield trends and identify root causes for production anomalies, contributing to a **7%** improvement in overall product yield over a quarter.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
