PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python** scripts to automate data extraction and transformation for supply chain reporting, processing approximately 15,000 records per hour.
- Designed and implemented **Java Spring Boot** REST APIs to integrate new inventory tracking modules with existing enterprise resource planning systems.
- Managed production support for critical enterprise applications on **AWS**, responding to P1/P2 incidents and ensuring adherence to strict operational SLAs.
- Collaborated with cross-functional teams to gather requirements and understand critical **supply chain challenges**, translating business needs into technical specifications.
- Analyzed and modeled large-scale datasets using **SQL** to uncover actionable insights that drive operational efficiency and inform demand forecasting strategies.
- Built and enhanced scalable systems for **supply chain data integration**, reporting, and visualization, supporting a user base of over 50 analysts.
- Containerized microservices using **Docker** and deployed them to an **AWS ECS** cluster, improving deployment consistency and reducing environment setup time by 40%.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, ECS)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Git, Jenkins, Jira, Splunk, Dynatrace

Data & Analytics – ETL, Data Pipelines, Data Modelling, Business Intelligence, Power BI, Tableau, DAX, Power Query

Supply Chain Concepts – Inventory Management, Demand Forecasting, Production Planning, Operations Research

PROJECTS

Supply Chain Optimization Engine (HCL Technologies)

- Developed a **Python**-based engine that analyzed historical sales data and external market factors to generate optimized **demand forecasts**, achieving an average forecast accuracy improvement of 18% over a 6-month period.
- Engineered data pipelines using **pandas** and **SQL** to ingest and pre-process data from multiple disparate sources, including ERP systems and operational logs, ensuring data integrity for downstream analysis.
- Built interactive dashboards in **Power BI** to visualize forecast accuracy, inventory levels, and production planning recommendations for supply chain stakeholders.

Automated Production Monitoring System (HCL Technologies)

- Designed and implemented a **Java Spring Boot** application that consumed real-time production data streams, performing anomaly detection for potential manufacturing defects.
- Integrated the application with **Splunk** for log aggregation and alerting, enabling proactive identification of issues and reducing manual monitoring effort by approximately 30%.
- Developed RESTful APIs to expose system status and alerts, facilitating integration with broader enterprise monitoring platforms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
