HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented core ML model inference pipelines using **Python** and **FastAPI**, achieving p95 latencies below **200ms** for real-time scoring.
- Developed and optimized feature extraction logic in **Python**, processing large datasets to generate behavioural signals for downstream machine learning models.
- Containerized ML services using **Docker** and deployed them onto **Kubernetes** clusters, managing configurations and basic resource allocation.
- Contributed to the development of machine learning algorithms for device behaviour analysis, focusing on pattern recognition and anomaly detection.
- Wrote production runbooks and internal documentation that the customer onboarding team now uses to bring new clients live in approximately **10 days** instead of 4+ weeks.
- Collaborated with cross-functional teams to integrate machine learning models into existing software frameworks, ensuring seamless performance and compatibility.
- Participated in code reviews and agile ceremonies, providing constructive feedback and contributing to sprint planning and technical estimations.

SKILLS

Programming Languages – Python, Java, C++, Bash, SQL

Machine Learning – Scikit-learn, Neural Networks, Model Inference, Feature Engineering, Model Evaluation

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Frameworks & Libraries – FastAPI, Spring Boot, Pandas, NumPy

Operating Systems – Linux

PROJECTS

ML Inference Service for Device Telemetry

- Built a **Python** service using **FastAPI** to deploy a trained classification model for analyzing device telemetry data, handling over **3,500 events/sec** at peak hours.
- Developed a data pipeline to extract and pre-process relevant features from raw telemetry streams, optimizing for performance and memory usage.
- Containerized the inference service with **Docker** and orchestrated deployments using **Kubernetes**, ensuring high availability and efficient resource scaling.

Anomaly Detection Model for System Performance

- Engineered a feature extraction pipeline in **Python** and **SQL** to gather system performance metrics, processing a dataset of approximately **1.1 million records**.
- Trained a **scikit-learn** classifier to identify performance anomalies, achieving an **AUC of 0.86** on a held-out test set.
- Packaged the model for potential integration into an observability platform, focusing on API design and input validation for ease of use.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
