PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** RESTful APIs for enterprise applications, ensuring seamless integration between internal services and external partners.
- Implemented robust data validation and error handling mechanisms within **Java applications**, reducing data-related incidents by approximately **15%**.
- Designed and executed comprehensive unit tests using **JUnit** and **Mockito** for critical Java modules, achieving over **90%** code coverage for new feature development.
- Collaborated with a cross-functional team of engineers and business analysts to define technical requirements and estimate effort for new features within an **Agile/Scrum** framework.
- Participated in regular **code reviews**, providing constructive feedback to peers and ensuring adherence to coding standards and best practices.
- Containerized backend services using **Docker**, contributing to a more consistent deployment process across development and production environments.
- Managed and troubleshooted production issues for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to defined SLAs.

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java modules into a microservices architecture using **Spring Boot**, improving system modularity and enabling independent deployments.
- Integrated the new microservices with existing enterprise systems via REST APIs and implemented data persistence using **Hibernate** and **PostgreSQL**.
- Developed comprehensive unit and integration tests with **JUnit**, achieving **85%** test coverage and significantly reducing post-deployment defects.

Automated Reporting Pipeline with Python

- Engineered a **Python**-based ETL pipeline to extract, transform, and load data from multiple sources into a central data warehouse for reporting.
- Automated the generation and distribution of weekly operational reports using **pandas** and scheduled execution via **cron jobs** on Linux.
- Reduced manual reporting effort by approximately **20 hours per week** for the operations team, enabling faster access to key business metrics.
