HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for backend data processing, incorporating robust error handling and asynchronous communication patterns.
- Developed and maintained **RESTful APIs** for cross-service data exchange, ensuring data integrity and adherence to API design best practices.
- Engineered **Python scripts** to automate data ingestion and transformation processes, reducing manual effort for reporting tasks by approximately 40% for the operations team.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict **SLA** targets, ensuring high availability.
- Collaborated with environmental scientists and hydrologists to integrate **Water Framework Directive (WFD)** compliance assessments into project lifecycles, ensuring adherence to legislation.
- Supported the standardization and automation of **WFD assessment processes** by contributing to the development of reusable assessment templates and data validation scripts.
- Containerized backend Java applications using **Docker** and managed deployments to **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Spring, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Domain Knowledge – Water Framework Directive (WFD), Environmental Compliance, Data Analytics, Financial Services Operations, ERP Systems

PROJECTS

Automated WFD Assessment Framework (HCL Technologies)

- Developed a **Python**-based framework to automate the collection and initial analysis of data required for **Water Framework Directive (WFD)** compliance assessments, streamlining the process for project teams.
- Integrated custom scripts to perform preliminary data validation against regulatory requirements, flagging potential non-compliance issues early in the assessment cycle for review by environmental specialists.
- Designed a modular architecture allowing for easy expansion to incorporate new WFD parameters and client-specific reporting needs, improving system adaptability.

Java-based Transaction Monitoring Service (HCL Technologies)

- Built a **Java Spring Boot** microservice to monitor real-time transaction flows within a financial operations dashboard, processing approximately **3,500 events per hour**.
- Implemented alert generation logic using **PostgreSQL** for failed or stuck transactions, reducing manual oversight requirements for operations teams by an estimated **20%**.
- Integrated with existing monitoring tools via **REST APIs** to provide operational status updates, ensuring visibility into system health for stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
