PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the setup and maintenance of core data elements including client, account, and instrument data, ensuring data quality across primary platforms for a financial-services client.
- Processed and settled trades accurately within strict daily deadlines, reconciling positions with internal and external counterparties and governing trade fails.
- Provided operational support for trade lifecycle events, including processing, settlement, accounting, and collateral management for securities and derivatives.
- Monitored daily client trading activity across multiple markets, addressing client needs and ensuring timely transaction completion with a high degree of accuracy.
- Identified and flagged potential operational risks to senior analysts and management, contributing to timely mitigation efforts in a high-volume environment.
- Collaborated with cross-functional teams, including business analysts and operations, to gather requirements, support user acceptance testing, and triage post-implementation issues.
- Containerized enterprise applications using **Docker** and managed deployments on **AWS EC2** instances, integrating with **Jenkins** CI/CD pipelines for automated testing and release.

SKILLS

Core Competencies – Collaboration, Customer and Client Focus, Oral Communications, Prioritization, Active Listening, Adaptability, Business Acumen, Client Management, Data Collection and Entry

Financial Operations – Trade Processing, Trade Settlement, Accounting, Reconciliation, Lifecycle Events, Collateral Management, Transaction Monitoring, Data Quality Management

Data Management – Core Data Setup, Client Data, Account Data, Instrument Data, Agreement Data, Data Governance

Cloud & DevOps – AWS EC2, Docker, Jenkins, CI/CD Pipelines, Git

Programming & Scripting – Java, Spring Boot, Python, SQL

Observability & Support – Splunk, Dynatrace, CloudWatch, Incident Response, SLA Management

PROJECTS

Financial Transactions Monitoring Dashboard

- Developed a **Java Spring Boot** application to ingest and process financial transaction data, enabling real-time monitoring of payment flows for a financial-services client.
- Implemented RESTful APIs for data retrieval and reporting, allowing operations teams to query transaction status and identify reconciliation breaks.
- Integrated **Splunk** for operational alerting and log analysis, facilitating faster incident detection and root cause analysis for failed transactions.

Automated Data Reconciliation Service

- Engineered a **Python**-based service to automate the reconciliation of trade settlement data between internal systems and external counterparties using **SQL**.
- Designed and implemented scheduled ETL jobs via **cron** and shell scripting to extract, transform, and load data from Oracle and PostgreSQL databases.
- Reduced manual reconciliation effort by approximately **40%**, improving data accuracy and freeing up operational staff for higher-value tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
