PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for core banking functionalities and handling approximately **1,500 requests per minute**.
- Engineered and optimized **Hibernate** queries for a financial services data access layer, improving retrieval performance for critical transaction data by an average of **18%**.
- Designed and implemented robust **JUnit** and **Mockito** test suites for new Java features, increasing code coverage by **30%** and reducing post-deployment defects.
- Managed the end-to-end product lifecycle for transaction processing solutions, from initial requirements gathering with business stakeholders to final release and support, ensuring alignment with corporate objectives.
- Participated in daily **Agile Scrum ceremonies**, including sprint planning and technical estimation, contributing to the timely delivery of features for a global transaction banking platform.
- Collaborated with cross-functional teams to integrate new payment processing capabilities into existing enterprise systems, ensuring seamless data flow and operational continuity.
- Deployed containerized Java applications to **AWS EC2** instances using **Docker**, managing build and deployment pipelines through **Jenkins** for consistent and reliable releases.

SKILLS

Languages – Java, Python, SQL, R, HTML, CSS, JavaScript

Frameworks & Libraries – Spring Boot, Hibernate, Spring MVC, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Tools & Technologies – Jira, Confluence, Splunk, Dynatrace, Linux, Shell Scripting

PROJECTS

Enterprise Java Payments Dashboard (HCL Technologies)

- Built a **Java Spring Boot** application to aggregate and display real-time transaction statuses from multiple financial messaging systems for a banking client.
- Implemented **PostgreSQL** schemas and optimized SQL queries to support high-volume data ingestion and retrieval for operational monitoring, handling approximately **1,200 transactions per second** during peak hours.
- Developed RESTful APIs for data export to downstream reporting tools, enabling operations teams to track payment flows and identify bottlenecks.

Transaction Reconciliation Automation (HCL Technologies)

- Automated key reconciliation workflows using **Python** scripts and **pandas**, processing over **50,000** transaction records daily to identify discrepancies.
- Integrated Python scripts with existing **Java** services via scheduled jobs and REST calls, reducing manual reconciliation effort by an estimated **40%**.
- Generated daily exception reports in CSV format for review by the financial operations team, improving the speed of issue resolution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
