HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing **REST APIs** for data exchange between core platform services, processing approximately **1,500 requests per minute**.
- Designed and implemented complex **JPA** entities and Hibernate mappings to manage relational data persistence for enterprise applications, ensuring data integrity across multiple modules.
- Authored **JUnit** and Mockito tests for critical Java components, achieving over **85% code coverage** for new feature development and reducing regression defects by **20%**.
- Collaborated with product management and quality engineering teams to define and refine software requirements, participating actively in **Agile and SAFe ceremonies** including sprint planning and backlog refinement.
- Investigated and resolved software defects, performing **root-cause analysis** and implementing fixes for issues reported in production environments, improving system stability by an estimated **15%**.
- Contributed to the development of cloud-connected applications and platform services, adhering to established engineering standards, **secure coding** practices, and architecture patterns.
- Containerized services using **Docker** and managed deployments within a cloud-native environment on **AWS**, ensuring efficient resource utilization and simplified deployment pipelines.

SKILLS

Programming Languages – Java, SQL, TypeScript, JavaScript, C#

Frameworks & APIs – Spring Boot, REST APIs, OpenAPI, Swagger, JPA, Hibernate, Angular

Cloud Platforms – AWS fundamentals, cloud-native concepts, containers, microservices

DevOps & SDLC – Git, Azure DevOps Boards and Pipelines, CI/CD, JUnit, automated testing, IntelliJ, Visual Studio Code

Security & Compliance – secure coding, Fortify, Snyk, Mend, design-controls awareness, requirements traceability

PROJECTS

Enterprise Java Application Modernization with Spring Boot and JPA

- Re-architected a monolithic legacy application into a set of **Spring Boot microservices**, enhancing modularity and maintainability for a large enterprise client.
- Implemented robust data access layers using **JPA and Hibernate** to manage complex transactional data, supporting over **50,000 customer records**.
- Developed comprehensive unit and integration tests using **JUnit**, ensuring the stability and reliability of critical business logic for the financial services platform.

Cloud-Native API Development for Platform Services

- Designed and built **REST APIs** using **Java Spring Boot** to expose core functionalities of a medication management platform, handling approximately **2,000 API calls daily**.
- Containerized the API services with **Docker** and deployed them to an **AWS** environment, enabling scalable and resilient operation for connected applications.
- Integrated API services with existing backend systems, ensuring seamless data flow and adherence to platform architectural guidelines.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
