PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to the scientific management of the **nuclear medicine** service, including diagnostic radiological uses of radioisotopes under senior supervision.
- Participated in the routine **QA arrangements** for all imaging equipment, involving detailed **measurement and analysis of data**.
- Managed the **safety of imaging and related equipment**, identifying potential faults and initiating appropriate corrective actions.
- Assisted with the **commissioning of new equipment** within the Radiology Department, ensuring operational readiness and adherence to safety protocols.
- Presented in-house **education and training sessions** to hospital staff on relevant physics and imaging topics.
- Actively engaged in **continuing professional development** activities to stay abreast of current advancements in medical physics.
- Containerized the feature-pipeline services with **Docker** and deployed them to a Kubernetes cluster (EKS), wiring up Helm chart configuration and basic resource limits for predictable rollout.

SKILLS

Medical Physics – Nuclear Medicine, X-ray Quality Assurance, MRI Support, Radioisotopes, Medical Imaging

Scientific Support – Diagnostic Imaging, Equipment Safety Management, Commissioning, Data Analysis

Healthcare Operations – Patient Care, Quality Management, Multidisciplinary Teamwork, Continuing Professional Development

Technical Skills – Python, Java, SQL, Spring Boot, AWS, Docker, Linux, Git, Jenkins, Splunk, Dynatrace, Power BI, R, Tableau

Radiology – Radio-therapeutic, Radiological, Diagnostic Radiology

PROJECTS

Medical Imaging QA Automation Framework

- Developed a Python framework to automate the collection and analysis of QA data for diagnostic imaging equipment, reducing manual effort by approximately **40%**.
- Integrated the framework with a PostgreSQL database to store historical QA metrics, enabling trend analysis and predictive maintenance insights.
- Designed and implemented interactive dashboards using **Power BI** to visualize QA performance, highlighting areas for improvement to the radiology team.

Nuclear Medicine Isotope Tracking System

- Engineered a Java Spring Boot application to track radioisotope inventory and usage in nuclear medicine procedures, ensuring compliance and reducing waste.
- Built RESTful APIs for seamless integration with existing hospital inventory management systems, facilitating real-time data synchronization.
- Implemented logging and alerting mechanisms using **Splunk** to monitor system health and flag potential anomalies in isotope handling.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
