PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed new software functionality for a **medication management platform** using **Java** and **Spring Boot**, integrating with **REST-based APIs**.
- Implemented application and service features for a cloud-connected **medication management platform**, adhering to **secure coding** standards and **regulatory requirements**.
- Built comprehensive **unit and integration tests** using **JUnit** to ensure software quality goals and facilitate root-cause investigations for defects.
- Participated actively in **Agile and SAFe ceremonies**, including sprint planning and backlog refinement, contributing to technical estimations for new features.
- Maintained detailed software documentation, including **requirements traceability** and design artifacts, essential for **regulated software development**.
- Collaborated effectively with cross-functional teams, including product management, quality engineering, and cybersecurity, to deliver integrated solutions.
- Containerized microservices using **Docker** and deployed them to an **AWS** environment, managing configurations within a CI/CD pipeline.

SKILLS

Programming – Java, SQL, JavaScript, TypeScript, C#/.NET

Frameworks & APIs – Spring Boot, Angular, REST APIs, OpenAPI / Swagger, JSON

Cloud – AWS fundamentals, cloud-native concepts, containers, microservices fundamentals

DevOps & SDLC – Git, Azure DevOps Boards and Pipelines, CI/CD, JUnit, automated testing, IntelliJ or Visual Studio Code

Security & Compliance – secure coding, Fortify, Snyk, Mend, design-controls awareness, requirements traceability

PROJECTS

Cloud-Connected Medication Management Service

- Developed a **Java Spring Boot** microservice to manage device data for a cloud-connected medication management system, handling data ingestion via **REST APIs**.
- Implemented robust error handling and logging mechanisms, integrating with **AWS CloudWatch** for operational monitoring and incident response.
- Designed and implemented automated tests using **JUnit**, achieving over 85% code coverage for critical service components.

API Integration for Healthcare Data Exchange

- Built a **Java**-based integration layer to connect disparate healthcare systems, parsing and transforming data formats using **JSON**.
- Developed **REST APIs** with clear documentation using **OpenAPI/Swagger** to facilitate seamless data exchange between internal and external services.
- Managed code versions and collaboration using **Git**, participating in code reviews to maintain code quality and adherence to engineering standards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
