PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained portfolio compliance and waterfall models for CLO structures, delivering accurate first-draft reports to Client Service Managers within agreed timelines.
- Analyzed and incorporated client and auditor feedback on complex CLO test results and model outputs, ensuring alignment and addressing concerns.
- Collaborated with internal Analytics teams to resolve modelling issues and support significant changes to reporting structures, maintaining data integrity.
- Engaged with Position Services to resolve exceptional data discrepancies, facilitating smooth communication between data providers and Client Service Managers.
- Performed ad-hoc SQL queries to validate transaction data and support reconciliation workflows for financial operations, ensuring data accuracy across systems.
- Automated report generation tasks using Python scripting, reducing manual effort for scheduled financial reporting by approximately 30% for the team.
- Containerized core Java Spring Boot services using Docker for deployment on AWS EC2 instances, improving deployment consistency and reducing setup time for new environments.

SKILLS

Reporting & Analysis – CLO, Structured Finance, Fixed Income, Portfolio Compliance, Waterfall Models, Financial Modeling, Data Analytics, VBA, SQL

Programming Languages – SQL, Python, Java, VBA

Databases – PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – Jenkins, Git, Jira, Confluence, Docker, Splunk, Dynatrace

PROJECTS

CLO Compliance Reporting Automation

- Developed a Python-based system to automate the generation of CLO compliance reports, integrating with SQL databases to pull necessary transaction and portfolio data.
- Implemented data validation checks using pandas to ensure the accuracy of inputs for waterfall models, reducing data-related errors in reports by 15%.
- Designed and built interactive dashboards using Power BI to visualize key CLO performance metrics and compliance status for management review.

Financial Transaction Data Analysis & Reconciliation

- Engineered Python scripts to parse and analyze large volumes of financial transaction data, supporting reconciliation workflows for a financial-services client.
- Wrote complex SQL queries across PostgreSQL and Oracle databases to identify discrepancies and support root cause analysis for failed payment messages.
- Collaborated with business analysts to gather requirements for enhanced transaction monitoring features on an internal operations dashboard.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
