PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and troubleshot multiple **robotic assembly systems** deployed at a major tech customer site, ensuring high system uptime and performance.
- Served as the primary technical interface between remote experts, field service engineers, and customer production leads, facilitating issue resolution and knowledge transfer.
- Collected and synthesized customer feedback on equipment performance, contributing to **continuous improvement processes** and product roadmap development.
- Assessed and resolved hardware and software anomalies using live data, diagnostic tools, and hands-on troubleshooting for complex electro-mechanical systems.
- Developed and maintained status reports detailing system performance and issue resolution for various stakeholder levels, including customer and internal teams.
- Educated customer teams on device operation, maintenance, troubleshooting, and repair procedures, enhancing their self-sufficiency and system understanding.
- Containerized **Java Spring Boot applications** and deployed them to **AWS EC2** instances using **Docker**, improving deployment consistency and reducing manual configuration.

SKILLS

Automation & Robotics – Robotic Assembly Systems, PLC, FANUC IR, FANUC DCS, Beckhoff PLC, Electro-mechanical Systems

Manufacturing & Inspection – Vision Systems, MATROX, COGNEX, Labeling Applications, Industrial Printers, HERMES, ZEBRA

Software & Systems – Java Spring Boot, Python, SQL, REST APIs, Docker, Linux, Git, Jenkins, Jira, Confluence

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch)

Documentation & Support – Technical Documentation, Electrical Schematics, Pneumatic Documentation, 2D/3D Mechanical Documentation, Customer Service, Reporting

Data Analysis – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

PROJECTS

Automated Production Line Monitoring System (HCL Technologies)

- Developed a Python-based monitoring system to collect real-time data from **robotic assembly lines** and **PLC** controllers, identifying performance bottlenecks.
- Built **REST APIs** using **Flask** to expose system status and diagnostic information, enabling integration with existing enterprise dashboards.
- Implemented automated data validation checks and anomaly detection using **pandas** and basic statistical methods, flagging potential equipment failures **2 days** earlier than manual checks.

Customer Onboarding Toolkit for Enterprise Automation (HCL Technologies)

- Created a comprehensive technical documentation suite for a financial-services client, including **electrical schematics**, pneumatic diagrams, and operational guides for automated systems.
- Designed and delivered training sessions to customer operations teams on system maintenance and basic troubleshooting, reducing support ticket escalations by **15%**.
- Developed **Python scripts** to automate the generation of system configuration reports from **SQL** databases, saving **5 hours** of manual effort per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
