HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered robust backend services using **Java Spring Boot** to handle high-volume transaction processing, ensuring data integrity across multiple service integrations.
- Developed and maintained complex relational database schemas and optimized queries in **PostgreSQL** and **MySQL**, supporting critical data retrieval for operational dashboards.
- Automated repetitive data extraction and transformation tasks using **Python scripting**, reducing manual processing time for weekly operational reports by approximately 40%.
- Implemented comprehensive monitoring and alerting for enterprise applications on **AWS CloudWatch** and **Splunk**, contributing to a reduction in critical incident response times by 15%.
- Containerized backend services using **Docker**, enabling consistent deployment across development and production environments and streamlining the CI/CD pipeline with **Jenkins**.
- Managed application configuration updates and system integrations for enterprise business systems, coordinating change control processes and facilitating user acceptance testing.
- Collaborated with cross-functional operations teams to gather requirements for new dashboard features and troubleshoot production issues, ensuring alignment with business needs.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, JUnit, Maven

Data Management – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, Data Modelling, Power Query

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Scripting & Automation – Python, Shell Scripting

Analytics & BI – Power BI, Tableau, DAX, R, scikit-learn, pandas, NumPy

Operations & Support – Splunk, Dynatrace, Jira, Confluence, Incident Response, Change Management

PROJECTS

Scalable Data Pipeline for Enterprise Operations

- Developed a Python-based ETL pipeline to ingest and transform data from disparate sources, feeding into a PostgreSQL data warehouse for an internal operations dashboard.
- Implemented data validation checks and error handling within the pipeline, reducing data quality issues reported by the analytics team by 28%.
- Scheduled and monitored pipeline execution using Linux cron jobs and shell scripting, ensuring timely availability of data for daily reporting cycles.

Java Spring Boot Microservice for Transaction Aggregation

- Designed and implemented a **Java Spring Boot** microservice responsible for aggregating transaction data from multiple upstream systems.
- Developed RESTful APIs to expose aggregated data for consumption by downstream reporting tools and operational dashboards.
- Integrated the service with a **PostgreSQL** database, defining schemas and writing efficient queries to support real-time data retrieval.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
