HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal microservices, handling approximately **1,500 requests per minute** during peak loads.
- Implemented data persistence using **Hibernate** and **JPA**, managing entity relationships and optimizing database interactions for core application features.
- Designed and executed unit tests for **Java** modules using **JUnit** and **Mockito**, achieving over **85% code coverage** for critical business logic.
- Participated in code reviews for new feature development, ensuring adherence to coding standards and identifying potential performance bottlenecks in **Java** applications.
- Assisted in the design and implementation of a new **NoSQL** data store integration for a high-throughput event-processing system.
- Contributed to **Agile** sprint planning, providing technical estimations for user stories and participating in daily stand-ups and retrospectives.
- Containerized the core application services using **Docker** and managed deployments to **AWS EC2** instances, improving deployment consistency across environments.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, Microservices, JUnit, Mockito, Maven, Gradle

Data Management – SQL, PostgreSQL, MySQL, Oracle, NoSQL, Data Warehousing, Data Modelling

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, pandas, NumPy, scikit-learn

Methodologies – Agile, Scrum, CI/CD, Incident Response, Change Management

PROJECTS

Enterprise Java Microservice for Transaction Processing

- Engineered a **Java Spring Boot** microservice responsible for processing financial transaction messages, designed to handle a volume of **~2,000 transactions per second**.
- Integrated **Hibernate** with **PostgreSQL** to manage transaction states and audit logs, ensuring data integrity and enabling efficient querying for reconciliation workflows.
- Developed RESTful endpoints for upstream and downstream system integration, including robust error handling and logging mechanisms for improved operational visibility.

Automated Data Pipeline for Financial Operations Reporting

- Developed a **Python** ETL pipeline using **pandas** and **SQLAlchemy** to extract, transform, and load data from disparate sources into a data warehouse for operational reporting.
- Implemented scheduled data refreshes and validation checks using **cron jobs** and shell scripting, ensuring data accuracy for daily financial reports and reducing manual effort by **~40%**.
- Created interactive **Power BI** dashboards that visualized key operational metrics, providing insights into transaction volumes, processing times, and error rates for business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
