PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Contributed to the authorisation assessments of financial services firm applications, analysing submissions and available data to draw conclusions and make recommendations for compliance with regulatory frameworks.
- Assessed supervised entities' compliance with relevant domestic and EU laws, regulations, and policies, maintaining supervisory files and updating risk assessments and mitigation plans.
- Developed and maintained positive stakeholder relationships to foster a culture of information sharing and collaboration within the directorate.
- Contributed to desk-based and themed reviews in relation to risk-based data analysis, delivering output in accordance with the Central Bank’s risk assessment process.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-service data exchange, incorporating request validation and circuit-breaker patterns to ensure reliable communication between enterprise systems.
- Managed production support for enterprise applications, including **Splunk** and **Dynatrace** monitoring, SLA management, and P1/P2 incident response, ensuring operational stability.
- Containerised microservices using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits for predictable rollout and scaling.

SKILLS

Banking & Finance – Credit Risk, Solvency, Liquidity, Market Risks, Operational Risk, IT Risk, Consumer Protection, Integrity Risks, Regulatory Returns, Financial Strategy

Supervision & Authorisation – Risk-Based Supervision, Outcome-Focused Approach, Firm Applications, Compliance Assessment, Governance, Business Models, Capital Plans, Regulatory Framework

Data Analysis & BI – Data Analysis, Statistical Analysis, Data Visualisation, Power BI, Tableau, DAX, Power Query, Business Intelligence, Exploratory Data Analysis

Programming & Scripting – Python, Java, SQL, Spring Boot, REST APIs, pandas, NumPy, scikit-learn, R

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux Shell Scripting

PROJECTS

Financial Services Operations Dashboard Enhancement

- Enhanced a financial-services operations dashboard by developing new **Python** scripts for automated data ingestion and ETL processes, reducing manual data preparation time by approximately 40%.
- Implemented real-time transaction monitoring features using **SQL** queries across PostgreSQL and Oracle databases, enabling faster identification of **~3,200 failed payments per week**.
- Collaborated with business analysts to refine operational alerting mechanisms and generate scheduled reports on payment reconciliation workflows, improving team efficiency.

Data Analytics for Regulatory Reporting

- Developed interactive **Power BI** dashboards to visualise key performance indicators and regulatory return data for financial services clients, facilitating clearer insights for stakeholders.
- Applied statistical methods and **Python** (pandas, NumPy) to analyse large datasets, perform exploratory data analysis, and identify trends relevant to risk assessments.
- Authored **DAX** measures and complex Power Query transformations to clean and model data, ensuring accuracy and consistency in reporting outputs for over 15 distinct regulatory metrics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
