PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for enterprise systems, handling approximately **500 requests per second** during peak loads.
- Implemented data persistence logic using **Hibernate** and JPA for a core financial services application, ensuring data integrity across related tables.
- Engineered Python scripts to automate data extraction and transformation from PostgreSQL and Oracle databases, reducing manual reporting effort by **30%**.
- Collaborated with clients and internal teams to design, specify, and certify algorithmic interfaces, facilitating successful go-live implementations for **8 new trading partners**.
- Served as a Level 2 support escalation point for the FIX network support team, resolving complex algorithmic trading inquiries and ensuring minimal disruption to production environments.
- Contributed to the automation of the algorithmic deployment process by developing scripts and refining configuration management, leading to a **20% reduction** in deployment cycle times.
- Containerized Java Spring Boot applications using **Docker** and deployed them to an AWS EC2 environment managed via Jenkins CI/CD pipelines.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Tools & Technologies – FIX, FIX Protocol, Algorithmic Trading, Trading Systems, Microsoft Excel, Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Algorithmic Interface Certification Platform

- Developed a Python-based framework to automate the testing and certification of FIX-based algorithmic trading interfaces, integrating with mock trading environments.
- Designed and implemented custom message validation routines in Python to ensure compliance with client-specific FIX protocol configurations, reducing certification errors by **45%**.
- Created comprehensive documentation and runbooks for the certification process, enabling faster onboarding of new algorithmic trading strategies.

Production Support Automation for Financial Dashboards

- Engineered Python ETL pipelines to aggregate operational data from multiple sources (PostgreSQL, Oracle) for a financial services dashboard, supporting transaction monitoring workflows.
- Automated the generation of daily operational reports using Python and SQL, providing critical insights into payment processing status and reducing manual report compilation time by **~3 hours per day**.
- Developed shell scripts for log analysis and health checks on Linux servers hosting the dashboard application, improving incident detection speed.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
