HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and deployed **OpenStack** private cloud solutions, managing compute, storage, and network resources for data center infrastructure.
- Authored and maintained **Terraform** scripts to automate the provisioning of cloud infrastructure, ensuring consistent and repeatable deployments.
- Developed Python scripts to automate cloud operations, including routine maintenance tasks and complex workflow orchestration, reducing manual intervention by approximately 40%.
- Monitored and optimized **OpenStack** environment performance and reliability using integrated tooling, identifying and resolving bottlenecks to maintain system stability.
- Troubleshot and resolved complex platform issues within the OpenStack environment, driving continuous improvements in stability and operational efficiency.
- Participated in code reviews for Python automation scripts and Terraform modules, ensuring adherence to best practices and improving overall code quality.
- Containerised platform services using **Docker** and managed deployments within a **Kubernetes** cluster, configuring resource limits and networking for predictable performance.

SKILLS

Cloud Platforms – OpenStack, AWS

Infrastructure as Code – Terraform

Automation & Scripting – Python

Containerization & Orchestration – Docker, Kubernetes

CI/CD – Jenkins

Operating Systems – Linux

PROJECTS

Automated OpenStack Deployment and Management

- Engineered an automated deployment pipeline for an **OpenStack** private cloud using **Terraform** and Ansible, reducing deployment time for new nodes by 60%.
- Developed a suite of **Python** scripts to automate common OpenStack administrative tasks, including user management, resource cleanup, and health checks, processing over 500 operations monthly.
- Integrated monitoring tools like **Prometheus** and Grafana to provide real-time visibility into OpenStack cluster performance and resource utilization.

Cloud Operations Automation Framework

- Built a Python-based framework to orchestrate complex cloud operational workflows, including automated backups, patching, and environment scaling, significantly reducing manual effort.
- Containerised key operational tools using **Docker**, ensuring consistent execution across different environments and simplifying deployment to a **Kubernetes** platform.
- Implemented CI/CD pipelines using **Jenkins** to automate the testing and deployment of new automation scripts and infrastructure configurations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
