PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot microservices for the Prime Sequel Platform, implementing RESTful APIs for P&L; allocation engine data processing.
- Designed and implemented data persistence layers using **Hibernate** and **JPA** for the Prime Sequel Platform, ensuring efficient data retrieval and integrity across relational databases.
- Constructed JUnit tests and utilized Mockito for unit testing Java components, achieving over 85% code coverage for critical modules within the P&L; allocation system.
- Collaborated with project managers and business stakeholders to translate complex financial requirements into well-architected technical solutions for the Prime Sequel Platform.
- Mentored junior engineers on best practices for Java development, TDD, and microservices architecture within the global development team.
- Participated in **Agile ceremonies** including sprint planning and technical estimation, contributing to the timely delivery of high-quality software releases.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits for predictable performance.

SKILLS

Languages – Java, SQL, Python, TypeScript, HTML5, CSS

Frameworks/Libraries – Spring Boot, Spring, Hibernate, JPA, Microservices, JUnit, Mockito, Angular

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Operating Systems – Linux

Methodologies – Agile, Scrum, TDD

Tools – Jira, Confluence, Splunk, Dynatrace

PROJECTS

Prime Finance P&L; Allocation Engine Enhancement

- Engineered new Java Spring Boot services to process and allocate profit and loss data, integrating with existing financial transaction streams.
- Implemented robust data validation and error handling logic using **Hibernate**, reducing data inconsistency issues by approximately 18% in the allocation engine.
- Developed comprehensive unit and integration tests with **JUnit** and Mockito, ensuring the stability and reliability of the new microservices.

Enterprise Systems Integration with Java

- Built **REST APIs** in Java Spring Boot to facilitate data exchange between the Prime Sequel Platform and core ERP systems, supporting critical business operations.
- Designed database schemas and wrote **SQL** queries for data synchronization and reporting across PostgreSQL and Oracle databases, supporting a team of 4 analysts.
- Managed application deployments and monitored performance using **AWS CloudWatch** and Splunk, addressing operational alerts within defined SLAs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
