HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for core financial services applications, handling approximately **5,000 requests per minute** during peak hours.
- Implemented **JPA and Hibernate** entities to manage complex relational data models, optimizing query performance for a high-volume transaction processing system.
- Designed and built automated Python scripts for ETL processes, moving and transforming **~1.5 TB of data** weekly from disparate sources into a centralized data warehouse.
- Contributed to business case development for new AI-driven product features, assessing potential revenue growth opportunities and identifying areas for data-driven insight integration.
- Assisted with process optimization initiatives, exploring how **AI/ML tools** could automate routine tasks and enhance decision-making within client-facing operations.
- Analyzed client transaction data using various analytical techniques, interpreting insights derived from **advanced analytical models** to refine service offerings.
- Containerized Python-based data processing services using **Docker** and deployed them to an **AWS ECS** cluster, ensuring scalable and reliable execution.

SKILLS

Programming Languages – Java, Python, SQL, R, DAX

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, ECS)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum, ETL, Data Warehousing, Business Intelligence, Change Management

PROJECTS

Financial Services Transaction Monitoring Dashboard

- Developed a **Java Spring Boot** backend service to aggregate transaction status data from multiple sources, supporting real-time operational alerting.
- Engineered **SQL queries** and data transformations using Python and pandas to populate the dashboard with key performance indicators for payment flows.
- Designed and implemented interactive visualizations in **Power BI**, enabling operations teams to track failed transactions and identify bottlenecks with **15 distinct visual reports**.

Customer Data Analytics Platform Enhancement

- Built Python data pipelines on **AWS Lambda** to ingest and process customer interaction data, handling an average of **~4,000 events per hour**.
- Developed **SQL scripts** for data validation and cleansing, ensuring data integrity for downstream analytical models and reporting.
- Collaborated with business analysts to gather requirements for new data features, translating them into technical specifications for the analytics platform.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
