PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided real-time operational support for electronic trading and clearing systems on **Coinbase Derivatives Exchange** and **Deribit**, addressing an average of **45** critical inquiries daily.
- Investigated and resolved complex customer issues related to exchange functionality, market events, and connectivity, maintaining response SLAs under high-volume conditions with a **98%** first-contact resolution rate.
- Coordinated with product and development teams to execute deployment testing for platform updates and new product launches in pre-production environments, reducing rollback incidents by **15%**.
- Supported the onboarding and operational enablement of new clients and vendors across both exchanges, including those utilizing prediction markets and event contracts.
- Documented and recommended improvements to operational processes, leading to a **10%** reduction in manual intervention for trade reconciliation workflows.
- Analyzed and resolved error trades by collaborating with internal and external stakeholders, implementing corrective actions within a **4-hour** window.
- Developed Python scripts to automate data extraction and reporting for market operations, reducing manual report generation time by **30%**.

SKILLS

Trading Systems – Electronic Trading, Clearing Systems, Exchange Applications, Market Operations, Error Trade Analysis, FIX Protocol

Cloud & Tools – JIRA, Salesforce, AWS, EC2, S3, Lambda, CloudWatch, Docker, Git, Jenkins

Programming & Scripting – Python, Java, SQL, Spring Boot

Databases – PostgreSQL, MySQL, Oracle

Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

Operating Systems – Linux

PROJECTS

Payments Operations Dashboard Enhancement

- Enhanced a financial-services operations dashboard by developing **Java Spring Boot** microservices for real-time transaction monitoring, processing approximately **3,000** transaction messages per minute.
- Implemented **SQL** queries and data validation routines across **PostgreSQL** and **Oracle** databases to ensure data integrity for reconciliation workflows and audit trails.
- Automated the generation of daily operational reports using **Python** scripting, delivering key performance indicators to operations teams and reducing manual effort by **20%**.

Enterprise System Integration Automation

- Developed **Python** scripts to automate data flow and integration tasks between ERP modules and other enterprise business systems, handling complex data transformations.
- Designed and implemented REST APIs using **Java Spring Boot** for cross-system communication, facilitating seamless data exchange and improving system interoperability.
- Managed change-control processes for configuration updates and coordinated User Acceptance Testing (UAT) for system integrations, ensuring smooth post-go-live operations for interconnected platforms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
