PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Prepared **consultation papers** and **decision documents** for regulatory review, detailing policy options and recommendations for **energy sector** stakeholders.
- Analyzed **spreadsheets of energy and water data**, identifying key **trends** and **anomalies** to inform policy development for the **regulatory authority**.
- Engaged with internal and external **stakeholders**, including counterparts in **EU policy forums**, to gather requirements and present findings on **industry developments**.
- Developed **Python scripts** to automate the extraction and aggregation of **operational data** from disparate sources, reducing manual processing time by approximately **30%**.
- Designed and implemented **SQL queries** for data validation and reporting across **PostgreSQL** and **Oracle** databases, ensuring data integrity for analytical use.
- Supported the integration of **Java Spring Boot** services with enterprise systems, contributing to the development of **REST APIs** for cross-system data exchange.
- Containerized a **Python-based data processing application** using **Docker** and deployed it to an **AWS EC2** instance, improving deployment consistency.

SKILLS

Regulatory Analysis – Policy analysis, Data analysis, Financial modelling, Stakeholder engagement, Report preparation, Presentation skills.

Data Engineering & Scripting – Python, SQL, PostgreSQL, Oracle, MySQL, ETL, Data pipelines, Automation scripting.

Backend Development – Java, Spring Boot, REST APIs, Microservices, Docker, AWS (EC2, S3, Lambda, CloudWatch).

BI & Data Visualization – Power BI, Tableau, DAX, Power Query, Data modelling, Business Intelligence.

Core Technologies – Linux, Git, Jenkins, Jira, Confluence, Agile methodologies.

PROJECTS

Energy Sector Data Analysis and Reporting Platform

- Developed a **Power BI dashboard** to visualize key performance indicators for energy consumption and regulatory compliance, presenting insights to management.
- Engineered **Python data pipelines** to ingest and transform data from multiple sources, including CSVs and relational databases, supporting the dashboard's data requirements.
- Wrote complex **SQL queries** against a PostgreSQL data warehouse to extract and prepare datasets for analysis, ensuring data accuracy and completeness for the reporting suite.

Internal Process Automation Tool (HCL Technologies)

- Created a **Python application** that automated the generation of weekly operational reports, saving approximately **5 hours** of manual effort per week for the support team.
- Integrated the tool with **Jira** to pull ticket data and with **Linux** shell scripts to manage file processing and scheduling via cron jobs.
- Designed a simple REST API using **Flask** to allow on-demand report generation and status checks, improving user interaction with the automation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
