PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to establishing and monitoring **critical parameters** for clean utility systems, supporting processes to remain in control within a biotech manufacturing environment.
- Supported troubleshooting efforts for unit operations and equipment issues, applying **formal problem-solving techniques** and documenting resolutions under senior engineer guidance.
- Learned to evaluate activities for impact on the **qualified state** of unit operations and equipment, utilizing appropriate business processes such as change control.
- Developed a strong **safety mindset** by actively participating in safety audits and hazard reviews, contributing to an improved safety culture.
- Assisted in the implementation of corrections and corrective actions arising from investigations into operational events, ensuring compliance and reliability.
- Gained exposure to system/component classification and maintenance strategies for **critical equipment** within controlled environments.
- Containerized and deployed Java Spring Boot applications to **AWS EC2** instances using Docker, managing CI/CD pipelines with Jenkins for automated testing and deployment.

SKILLS

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Linux, Shell Scripting, Cron Jobs

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, Splunk, Dynatrace, Power BI, Tableau, Power Query, DAX

Domain Knowledge – Biotech Manufacturing, Clean Utility Systems, Grey Systems, Unit Operations, Equipment Maintenance, Change Control, Root Cause Analysis, Regulatory Compliance, GDPR Awareness

PROJECTS

Industrial Control System Monitoring Dashboard

- Developed a **Java Spring Boot application** with a RESTful API to ingest real-time data from industrial control sensors.
- Designed and implemented a **PostgreSQL database schema** to store time-series operational data, supporting efficient querying for performance analysis.
- Created a basic **Splunk dashboard** to visualize key operational parameters and alert thresholds for system anomalies, aiding in proactive issue detection.

Automated Equipment Performance Reporting

- Engineered **Python scripts** to extract performance metrics from equipment logs and operational databases, automating data collection.
- Built data processing pipelines using **pandas** to clean, transform, and aggregate raw data into structured reports for analysis.
- Generated scheduled **tabular reports** summarizing equipment uptime and maintenance events, reducing manual reporting effort by approximately 15% per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
