HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git**, automating build, test, and deployment processes for core platform services, reducing manual deployment time by **40%**.
- Managed and secured **cloud infrastructure** on **AWS** (EC2, S3, Lambda, CloudWatch) through **infrastructure-as-code** principles, ensuring reliable and scalable runtime environments.
- Developed **Python scripts** for automating data ingestion and transformation tasks, improving the efficiency of data wrangling for the AI platform by an estimated **30%**.
- Built and maintained containerized applications using **Docker** and orchestrated deployments on **Kubernetes** (EKS), ensuring consistent runtime environments and simplified scaling.
- Implemented comprehensive **observability** solutions including logging with **Splunk** and monitoring with **Dynatrace**, enabling proactive identification and resolution of production issues.
- Collaborated with **software, data, and AI/ML teams** to support feature development and build internal tooling, contributing code to platform enhancements and automation initiatives.
- Managed runtime environments, including **container orchestration**, **secrets management**, and **identity and access controls**, to maintain secure and operational platform stability.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS)

CI/CD & Automation – Jenkins, Git, Bash Scripting, Python Scripting

Infrastructure as Code – Terraform, Configuration Management

Programming Languages – Python, Go (Golang), SQL, Bash

Observability & Monitoring – Splunk, Dynatrace, Logging, Alerting

Security – Secrets Management, Identity and Access Management, Secure Operations

PROJECTS

AI Platform CI/CD and Deployment Automation

- Engineered automated **CI/CD pipelines** using **Jenkins** and **Git** to manage the release cycle of the AI platform's core services, enabling faster and more reliable deployments.
- Containerized microservices with **Docker** and managed their deployment and scaling on **Kubernetes (EKS)**, improving environment consistency and operational efficiency.
- Implemented **infrastructure-as-code** with **Terraform** to provision and manage AWS resources, ensuring reproducible and secure cloud environments for development and production.

Data Wrangling and Observability Tools for DFIR

- Developed **Python scripts** to automate the ingestion and initial processing of digital forensics and incident response (DFIR) data, reducing manual data wrangling time by **~35%**.
- Integrated **Splunk** for centralized logging and configured alerts to monitor the health and performance of data processing jobs, enhancing system visibility.
- Wrote **Bash scripts** for log analysis and system health checks on Linux servers supporting the DFIR tooling, contributing to overall platform reliability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
