HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed large volumes of security event data and endpoint telemetry, identifying emergent threat patterns for the Office of Adversary Strategy.
- Designed and maintained **Power BI** dashboards tracking key security metrics for product adoption and performance, translating complex findings into actionable insights.
- Developed and maintained data pipelines and reporting workflows using **Python** and **SQL** to process security telemetry and threat intelligence feeds.
- Collaborated with data engineering teams to ensure data quality, integrity, and accessibility for critical security analysis initiatives.
- Translated ambiguous security questions into structured analytical approaches, performing quantitative reasoning on large-scale, high-velocity datasets.
- Contributed to the development of KPIs and metrics frameworks for measuring security product performance and adoption, working cross-functionally with product teams.
- Containerized data processing services with **Docker** and deployed them to **AWS Lambda** for efficient, scalable execution of analytical workflows.

SKILLS

Data Analysis & Visualization – Power BI, Tableau, R, Python (pandas, NumPy, scikit-learn), SQL, DAX, Data Modelling, Business Intelligence

Programming & Scripting – Python, Java, Spring Boot, Flask, FastAPI, R

Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, SQL, Relational Databases

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

DevOps & CI/CD – Docker, Jenkins, Git

Cybersecurity Concepts – Threat Intelligence, Security Telemetry, SIEM Data, MITRE ATT&CK; Framework

Tools & Methodologies – Jira, Confluence, Agile/Scrum, Logscale

PROJECTS

Security Telemetry Analysis Dashboard

- Developed a comprehensive **Power BI** dashboard to visualize security event data, endpoint telemetry, and threat intelligence feeds, enabling trend identification for the Office of Adversary Strategy.
- Wrote complex **SQL** queries against large-scale datasets to extract and aggregate relevant security metrics, feeding data into the reporting workflow.
- Collaborated with internal stakeholders to define key performance indicators and ensure the dashboard provided actionable insights for strategic decision-making.

Threat Intelligence Data Pipeline Automation

- Engineered an automated data pipeline using **Python** to ingest and process diverse threat intelligence feeds, enriching security event data for deeper analysis.
- Implemented error handling and monitoring within the pipeline to ensure data integrity and timely processing of approximately 50,000 daily threat indicators.
- Stored processed data in a **PostgreSQL** database, optimizing schemas for efficient querying by analytical tools and downstream systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
