HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented a **Python** data pipeline on **AWS Lambda** to process and transform ~5,000 daily financial transaction records, enabling downstream analytical reporting.
- Developed **Java Spring Boot** REST APIs to integrate with enterprise ERP systems, facilitating bi-directional data flow for operational reporting and system configuration updates.
- Managed production incidents for enterprise financial-services applications, performing root cause analysis and coordinating resolutions to meet strict SLAs, reducing critical incident duration by 15% on average.
- Contributed to the development of a **payments operations dashboard**, focusing on transaction monitoring and operational alerting for failed payment messages, improving team response time by 10%.
- Executed ad-hoc SQL queries across **PostgreSQL** and **MySQL** databases for data validation and support, including schema change management for ~50 tables.
- Collaborated with business analysts and operations teams to gather requirements for system enhancements, supporting User Acceptance Testing (UAT) for new feature rollouts.
- Containerised several **Java** microservices using **Docker**, enabling consistent deployment across development and staging environments via **Jenkins** pipelines.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Developed Python scripts to automate the ingestion and parsing of ~3,000 daily transaction messages from various sources into a central PostgreSQL database.
- Engineered Java Spring Boot services to process and validate transaction data, identifying and flagging ~5% of messages with operational anomalies for review.
- Designed and implemented a subset of operational dashboards using internal tools to visualize transaction flow and alert on processing bottlenecks for key financial workflows.

ERP Integration Service (HCL Technologies)

- Built a Java Spring Boot microservice to expose REST APIs for real-time data retrieval from an enterprise ERP system, serving data to ~4 internal applications.
- Implemented database-level data synchronization logic between PostgreSQL and Oracle databases to ensure data consistency across interconnected business systems.
- Managed change control processes for system configuration updates, coordinating UAT and providing post-go-live support for a team of 5 business users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
