HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for enterprise applications, handling approximately **1,500 requests per minute**.
- Implemented robust persistence layers using **Hibernate** and **JPA**, ensuring data integrity across complex relational schemas.
- Designed and implemented **JUnit** test suites and utilized **Mockito** for unit testing Java components, achieving over **90% code coverage**.
- Contributed to the design and implementation of AI-powered solutions, focusing on integrating **Generative AI** capabilities into existing workflows.
- Participated in **Agile Scrum ceremonies**, including sprint planning and technical estimation, to deliver features in iterative cycles.
- Worked with **data scientists** to integrate machine learning models into production environments, focusing on **AI-Native** software engineering principles.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, facilitating scalable and reliable service delivery.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, LangChain

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

AI & ML – Generative AI, AI Agents, Retrieval-Augmented Generation (RAG), Machine Learning Fundamentals

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Agile Scrum

PROJECTS

AI-Powered Data Augmentation Pipeline

- Developed a Python pipeline using **pandas** and **scikit-learn** to preprocess and augment datasets for machine learning model training.
- Integrated **LangChain** to implement Retrieval-Augmented Generation (RAG) for enhancing model context and accuracy on diverse data sources.
- Packaged the pipeline as a REST API using **FastAPI**, enabling seamless integration with downstream AI services and achieving p95 latency below **200ms**.

Intelligent Automation for Enterprise Workflows

- Built a **Java Spring Boot** application to automate routine enterprise tasks, processing approximately **500 tasks daily**.
- Implemented RESTful APIs for system integration, enabling communication between the automation service and existing business platforms.
- Containerized the application using **Docker** and deployed it to an **AWS** environment, improving deployment efficiency by **30%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
