HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** data pipelines on **AWS Lambda** and **S3** to ingest third-party SaaS billing data, processing approximately **4,000 events per second** during peak hours.
- Developed and maintained **REST APIs** using **Java Spring Boot** for data exchange between the integration framework and downstream analytics services, incorporating request validation and circuit-breaker patterns.
- Engineered reconciliation logic in **Python** to identify and correct discrepancies in ingested vendor spend data, reducing data duplication by an estimated **15%** across multiple SaaS platforms.
- Worked with product managers to define requirements for new vendor integrations, translating business needs into technical specifications for API consumption and data normalization.
- Owned the end-to-end orchestration and scheduling of data ingestion pipelines using **Dagster**, ensuring reliable data backfills and routine processing across a growing number of SaaS vendors.
- Built normalization models in **Python** to standardize cost categories, units, and resource taxonomies across diverse SaaS billing APIs, making spend data comparable for enterprise customers.
- Containerized data pipeline services using **Docker** and deployed them to a managed **Kubernetes** cluster (EKS), configuring resource limits for predictable performance and scaling.

SKILLS

Languages – Python, Java, SQL, Bash

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Data Engineering & Orchestration – Dagster, Airflow, SQL, Data Warehousing, ETL, Data Modelling, Pandas, NumPy

API Integration – REST APIs, API Design, Pagination, Rate Limiting

Containerization & Orchestration – Docker, Kubernetes

Observability & CI/CD – Jenkins, Git, Splunk, Dynatrace

Business Intelligence – Power BI, Tableau, DAX, Power Query

PROJECTS

Multi-Vendor SaaS Billing Integration Framework

- Developed a **Python**-based framework to integrate with diverse third-party SaaS billing APIs, including handling pagination, rate limits, and late-arriving data.
- Designed and implemented data normalization logic to standardize cost attributes across **10+ vendors**, enabling consistent reporting and analysis of cloud spend.
- Built automated data validation checks and reconciliation processes to ensure data correctness and completeness, reducing manual verification effort by **~40%**.

Cloud Cost Anomaly Detection Pipeline

- Engineered a **Python** pipeline using **Pandas** and **NumPy** to process cloud usage data from AWS Cost and Usage Reports (CUR).
- Applied statistical methods to identify anomalous spending patterns, developing a classifier that flagged unusual spikes with **~88% precision**.
- Containerized the pipeline with **Docker** and scheduled its execution using **Jenkins**, ensuring regular updates for financial analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
