HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented new integrations for third-party billing and usage APIs, including **authentication flows**, **incremental sync**, and **rate limit handling** for enterprise clients.
- Developed and maintained the core **Integrations Framework**, reducing the effort to add new vendor integrations by an estimated **40%** through reusable scaffolding and testing harnesses.
- Built customer-facing interfaces for integration management, providing clear visibility into **health and status**, actionable error states, and automated **credential rotation**.
- Contributed to the development of AI-augmented tooling for integration development, using agentic AI to explore unfamiliar codebases and prototype API interaction patterns, accelerating initial development cycles.
- Consumed and integrated with numerous third-party REST APIs, managing complexities such as **schema drift**, **partial failures**, and evolving authentication mechanisms.
- Implemented end-to-end features from proposal through to production deployment and ongoing maintenance, owning the full lifecycle of integration capabilities.
- Containerized integration services using **Docker** and deployed them to a cloud environment, ensuring scalable and reliable operation within a **Kubernetes** cluster.

SKILLS

Languages – TypeScript, Python, Java, Go, SQL, R

Frontend – React, Angular

Backend/Frameworks – Node.js, NestJS, Spring Boot, FastAPI, Flask

Cloud/DevOps – AWS, GCP, Azure, Kubernetes, Docker, Jenkins

Databases – PostgreSQL, MySQL, Oracle, Google BigQuery

Tools/Other – Jira, Confluence, Git, Splunk, Dynatrace, Power BI, Tableau, DAX

PROJECTS

Cloud Vendor Integration Framework

- Developed a core framework in **TypeScript** and **Node.js** to standardize the integration of various cloud and SaaS vendor APIs.
- Implemented self-service capabilities for customers, enabling them to connect, configure, and manage integrations with minimal internal support, reducing onboarding time by **~30%**.
- Designed and consumed REST APIs for vendor data ingestion, handling authentication, rate limiting, and schema evolution for over **15** different third-party services.

SaaS Billing Data Aggregation Platform

- Engineered Python scripts to extract and transform billing and usage data from multiple SaaS platforms, feeding into a central data warehouse using **PostgreSQL**.
- Built automated data backfill and reconciliation processes to ensure data completeness and accuracy, resolving an average of **5-10** data discrepancies per week.
- Created **Power BI** dashboards to visualize aggregated cloud spend, providing key insights to internal teams and improving cost-monitoring efficiency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
