HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered and deployed **Java Spring Boot** microservices for internal tooling, incorporating **RESTful APIs** and handling asynchronous event processing via Kafka.
- Developed and maintained **Java persistence layers** using **Hibernate** and **JPA**, optimizing database interactions for core financial services applications.
- Authored **JUnit** test suites and implemented **Mockito** mocks to ensure code quality and adherence to design patterns for enterprise Java applications.
- Improved **CI/CD pipelines** using **Jenkins** and **Git**, reducing deployment lead time for core services by **30%** through automated testing and staging.
- Responded to and resolved high-priority production incidents for enterprise applications, performing **root cause analysis** and implementing corrective actions within defined SLAs.
- Designed and implemented **containerisation** strategies using **Docker** for microservices, streamlining deployment and improving consistency across development and production environments.
- Managed and optimized cloud infrastructure on **AWS**, including **EC2** instances, **S3** storage, and **Lambda** functions, to support scalable and reliable application delivery.

SKILLS

Languages – Java, Python, SQL, Go

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Containerisation & Orchestration – Docker, Kubernetes

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, REST APIs

PROJECTS

Scalable Java Microservices for Internal Operations

- Developed a suite of **Java Spring Boot** microservices to automate internal operational tasks, exposing functionality via **RESTful APIs**.
- Integrated services with a **PostgreSQL** database using **Hibernate**, managing data schemas and ensuring transactional integrity for key workflows.
- Containerised services with **Docker** and deployed them to an **AWS EC2** environment, establishing basic health checks and monitoring via **CloudWatch**.

Python-based Automation for Production Monitoring

- Created Python scripts to parse logs from **Splunk** and **Dynatrace**, identifying error patterns and generating automated alerts for production issues.
- Developed data pipelines using **pandas** to aggregate monitoring data, facilitating faster **root cause analysis** for P1/P2 incidents.
- Scheduled and executed automation scripts using **Cron** jobs on **Linux** servers, reducing manual effort for routine system checks by approximately **4 hours per week**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
