# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for cross-service data exchange and processing approximately **2,000 requests per second** during peak loads.
- Engineered data pipelines using **Python** and **pandas** to automate ETL processes for operational reporting, reducing manual data aggregation time by **over 60%**.
- Managed production support for enterprise applications on **AWS**, responding to P1/P2 incidents and ensuring adherence to strict service level agreements (SLAs) using **Splunk** and **Dynatrace**.
- Collaborated with cross-functional teams to define technical requirements and estimate effort for new feature development within an Agile/Scrum framework.
- Designed and implemented database schema changes and optimized complex SQL queries across **PostgreSQL** and **MySQL** for enhanced data retrieval performance.
- Containerised Java applications using **Docker**, facilitating consistent deployment environments and streamlining the CI/CD process with **Jenkins**.
- Participated in code reviews and mentored junior engineers on best practices for **Java** development and object-oriented design principles.

## SKILLS

**Programming Languages** – Java, Python, SQL, R

**Frameworks & Libraries** – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

**Databases** – PostgreSQL, MySQL, Oracle

**Developer Tools & Methodologies** – Git, Jenkins, Jira, Confluence, Agile, Scrum

**Data Analysis & BI** – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing

**Monitoring & Observability** – Splunk, Dynatrace

## PROJECTS

### Enterprise Java Application Modernisation

- Refactored legacy Java components into a modular **Spring Boot** application, enhancing maintainability and introducing **RESTful APIs** for core business functions.
- Implemented robust error handling and logging mechanisms across the service layer, improving incident triage time by an estimated **20%**.
- Integrated the new service with existing backend systems via database-level data flows and RESTful integrations, ensuring seamless data consistency.

### Automated Reporting Pipeline (Python)

- Developed a **Python**-based ETL pipeline to extract, transform, and load data from multiple enterprise systems into a central data warehouse.
- Automated the generation of weekly operational summary reports using **pandas** and scheduled their distribution via email, saving approximately **5 hours** of manual work per week.
- Applied data validation checks and cleansing routines within the pipeline to ensure data accuracy and integrity for downstream analysis.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
