HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices to support new feature development, focusing on RESTful API design and asynchronous processing.
- Developed and maintained **Hibernate** entities and complex JPQL queries to manage relational data persistence for core application modules, ensuring data integrity across transactions.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito** for critical Java components, increasing code coverage by **18%** and reducing post-deployment defects.
- Contributed to the design and implementation of **Python**-based ETL pipelines for data ingestion and transformation, processing approximately **50 GB** of raw data daily.
- Managed incident response and system monitoring for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 incidents within defined SLAs and documenting root cause analyses.
- Containerized backend services using **Docker** and managed deployments to **AWS EC2** instances, improving application portability and simplifying the CI/CD workflow.
- Collaborated with cross-functional teams in an **Agile/Scrum** environment, participating in sprint planning, daily stand-ups, and providing technical estimates for new feature requests.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

Data Visualization & BI – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Backend for Infrastructure Monitoring

- Developed a **Java Spring Boot** application to ingest and process real-time telemetry data from distributed infrastructure components, managing approximately **1,500 events per second**.
- Implemented data persistence using **Hibernate** and **PostgreSQL**, designing a schema to efficiently store and query time-series metrics and alert configurations.
- Integrated the service with a custom dashboarding tool, enabling operations teams to visualize system health and performance trends, reducing manual data compilation time by **40%**.

Python-based Data Pipeline for System Analytics

- Engineered a **Python** data pipeline using **pandas** to extract, transform, and load operational logs from various sources into a centralized data warehouse.
- Automated data validation checks and anomaly detection within the pipeline, identifying and flagging data quality issues that previously went unnoticed, improving data accuracy by an estimated **22%**.
- Scheduled and monitored pipeline execution using **cron jobs** and shell scripting on **Linux**, ensuring reliable data availability for downstream analytical reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
