HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** data pipelines to ingest and transform energy consumption data from various sources, automating reporting processes that reduced manual effort by approximately **30%**.
- Developed and maintained **Java Spring Boot** REST APIs for integrating disparate systems, ensuring seamless data exchange and supporting a **15%** increase in inter-service communication efficiency.
- Analyzed and optimized **SQL** queries across PostgreSQL and Oracle databases, improving report generation times for key operational dashboards by an average of **22%**.
- Contributed to the development of a **data visualization** platform by building interactive dashboards using **Power BI**, enabling stakeholders to track key performance indicators for energy grid operations.
- Collaborated with cross-functional teams to gather requirements and deliver features for an enterprise resource planning system, participating in **Agile ceremonies** and managing tasks within **Jira**.
- Managed production environments on **AWS**, utilizing **EC2** and **S3** for application deployment and data storage, while monitoring system health through **CloudWatch**.
- Containerized multiple applications using **Docker**, facilitating consistent deployment across development, testing, and production environments and improving deployment speed by **40%**.

SKILLS

Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Analytics – Power BI, Tableau, DAX, Power Query, data modelling

Tools & Methodologies – Jira, Confluence, Agile, Scrum, REST APIs

PROJECTS

Energy Consumption Analytics Dashboard

- Developed a comprehensive **Power BI** dashboard to visualize real-time energy consumption patterns across different regions, integrating data from multiple API sources.
- Engineered **Python** scripts using pandas to clean, transform, and aggregate large datasets, preparing them for analysis and dashboard population, handling approximately **50,000** data points daily.
- Designed the data model within Power BI, creating complex **DAX** measures to support trend analysis and anomaly detection for energy usage.

Internal Data Pipeline Automation

- Automated a critical data extraction and loading process for internal business intelligence using **Python** and **SQL**, reducing manual intervention from daily to weekly.
- Built a series of reusable **Python** functions to handle data validation and error logging, ensuring data integrity for downstream reporting systems.
- Deployed the automation scripts to an **AWS Lambda** function, triggered by a schedule, demonstrating proficiency in cloud-based workflow orchestration.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
