PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supported and maintained mission-critical **Operational Technology (OT) systems**, including SCADA and NMS, ensuring system availability and performance for national electricity network operations.
- Troubleshot and resolved complex application, integration, and **OT issues** within SCADA and NMS environments, reducing mean time to resolution by approximately **18%**.
- Developed and maintained custom interfaces between **OT systems** (SCADA, NMS) and enterprise applications using **Java Spring Boot** and **SQL**, ensuring seamless data exchange and operational effectiveness.
- Performed data maintenance activities, including data quality validation and environment refreshes for **SCADA and NMS databases**, contributing to data integrity for network analysis.
- Contributed to the ongoing evolution of smart network capabilities by supporting enhancements for increased renewable generation and network flexibility using **Python scripting** for data processing.
- Collaborated with OT vendors to review and approve change requests, guide the implementation of new functionality, and coordinate issue resolution with vendor support teams.
- Containerised backend services with **Docker** and deployed to **AWS EC2** instances, streamlining deployment pipelines with **Jenkins** for improved release cycles.

SKILLS

OT Systems – SCADA, NMS, GIS, DMS, FLISR, DERMS

Integration & APIs – REST APIs, Java Spring Boot, Python

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & CI/CD – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Monitoring & Scripting – Splunk, Dynatrace, Python, Shell Scripting

Methodologies – Agile, Scrum, Change Management, Incident Response

PROJECTS

SCADA/NMS Integration Enhancement (HCL Technologies)

- Engineered a new integration layer using **Java Spring Boot** and **PostgreSQL** to connect the payments operations dashboard with an enterprise ERP system for consolidated reporting.
- Developed **Python scripts** to automate data validation and transformation for ~15,000 daily transaction records before ingestion into the SCADA/NMS reporting module, reducing manual effort by **40%**.
- Implemented robust error handling and logging mechanisms for the integration pipeline, ensuring audit trails and compliance with operational data requirements.

Operational Data Dashboard Development (MSc Project)

- Designed and built interactive **Power BI dashboards** to visualize key operational metrics derived from network performance data, enabling faster decision-making for stakeholders.
- Developed complex **DAX measures** and data models in Power BI to support real-time monitoring of system availability and incident response times.
- Applied data warehousing principles and **Power Query** for ETL processes, transforming raw data into actionable insights for the analytics team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
