PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python**-based data pipelines for ETL processes, handling approximately **5,000 data records** per batch job.
- Designed and implemented **Java Spring Boot** REST APIs to support new platform features, ensuring seamless integration with existing microservices.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, resolving P1/P2 incidents within defined SLAs.
- Built and deployed containerized applications using **Docker** and configured CI/CD pipelines with **Jenkins** for automated testing and deployment.
- Collaborated with frontend engineers and product managers to define API contracts and deliver features for the core platform, participating in daily stand-ups and sprint planning.
- Integrated new functionality into existing systems by developing RESTful APIs, adhering to common software design patterns and ensuring compatibility with enterprise solutions.
- Strengthened internal infrastructure by implementing automated monitoring solutions and refining deployment processes to ensure product performance and security during user growth.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools/Observability – Splunk, Dynatrace, Jira, Confluence, Git

Data Analytics/BI – Power BI, Tableau, DAX, Power Query, Data Modelling

PROJECTS

Scalable AI Service Orchestration Platform

- Developed a **Python**-based backend service using **FastAPI** to orchestrate calls to multiple AI models, managing concurrent requests for approximately **1,500 users**.
- Implemented asynchronous task processing with **Celery** to handle background jobs for model inference, ensuring p95 response times remained below **300ms**.
- Designed and deployed the service on **AWS Lambda** within a **Docker** container, integrating with **PostgreSQL** for state management and configuration.

Customer Experience Enhancement API

- Built a **Java Spring Boot** microservice to expose core platform functionalities via REST APIs, enabling third-party integrations for enterprise clients.
- Collaborated with a customer success team to define requirements and integrate the API into a pilot customer's workflow, supporting their initial rollout phase.
- Authored comprehensive API documentation and ran technical walkthrough sessions for the customer's engineering team, facilitating their adoption of the new service.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
