PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Collaborated with cross-functional teams across different departments and regions to align operational strategies with organizational objectives, facilitating knowledge sharing and driving continuous improvement.
- Supported local Demand Response Operations (DRO) teams by providing training, implementing process improvements, and advocating for the adoption of appropriate tools and systems.
- Promoted global best practices and Standard Operating Procedures (SOPs) to ensure consistency and efficiency in program execution across multiple regions.
- Maintained key performance indicators (KPIs) to monitor the performance of global programs, identify trends, and measure progress towards operational goals, reporting on a weekly basis.
- Identified opportunities for process optimization and efficiency gains within the Flex Platform and ECRM Database, proposing solutions for margin increases and risk reduction.
- Participated in User Acceptance Testing (UATs) for the Flex Platform, providing feedback on functionality and usability from an operational perspective.
- Created and maintained documentation and training resources for local teams, enabling them to effectively manage and operate flexibility programs.

SKILLS

Core Competencies – Systems Thinking, Stakeholder Management, Process Improvement, Cross-functional Collaboration, Training & Documentation, KPI Monitoring, Risk Reduction, User Acceptance Testing

Productivity Tools – Microsoft Excel, Salesforce CRM

Energy Sector – Demand Response (DR), Distributed Energy Resources (DER), Flexibility Programs, Network Operations Center (NOC)

Operations Management – Standard Operating Procedures (SOPs), Operational Strategy, Program Execution, Performance Monitoring

Software Development Lifecycle – Agile Methodologies, Change Management, Issue Escalation

PROJECTS

Global Flexibility Program Process Standardization

- Developed and documented a set of global best practices and Standard Operating Procedures (SOPs) for Demand Response (DR) and Distributed Energy Resource (DER) program execution, aiming for scalable implementation.
- Created training materials and conducted workshops for local operations teams across three regions to ensure consistent adoption of new processes and tools, improving operational efficiency by an estimated 15%.
- Collaborated with Global Product Line (GPL) and local DRO teams to gather requirements for system enhancements, contributing to the design of improved workflows within the Flex Platform.

Internal Stakeholder Feedback System for Platform Improvement

- Designed and deployed a survey system using Python scripting to gather feedback from internal stakeholders on the usability and effectiveness of the internal ECRM Database and Flex Platform.
- Analyzed survey results from over 50 internal users, identifying key areas for improvement in system performance and user experience, and presented findings to the product development team.
- Contributed to the UAT process for a new iteration of the Flex Platform, focusing on validating bug fixes and new features identified through stakeholder feedback.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
