PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** data pipelines on **AWS Lambda** for ETL processes, transforming and loading data for downstream analytics, processing approximately **3,500 events per second** during peak hours.
- Engineered and maintained **Java Spring Boot** REST APIs supporting core backend services, focusing on feature development and bug resolution within an enterprise application suite.
- Developed and optimized **SQL** queries across **PostgreSQL** and **Oracle** databases for data validation and ad-hoc reporting, managing schema modifications for interconnected business systems.
- Contributed to the design and development of data pipelines supporting AI initiatives, preparing and transforming datasets for experimentation and model training.
- Implemented data governance and security controls for data pipelines, ensuring data quality, reliability, and adherence to enterprise standards.
- Collaborated with the Porto AI team to establish common data standards and engineering practices, promoting consistency in AI data architecture patterns.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, integrating with **Jenkins** for automated CI/CD workflows.

SKILLS

Cloud Data Services – Azure Data Services, Microsoft Fabric, Databricks, Synapse.

Data Engineering – Data Pipelines, Data Platforms, Feature Engineering, Data Preparation, Data Transformation, Data Enrichment.

Programming Languages – Python, SQL, Java.

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch).

Containerization & CI/CD – Docker, Jenkins.

Databases – PostgreSQL, MySQL, Oracle.

AI/ML Lifecycle – MLOps, AI Operationalisation, AI Architecture Patterns.

PROJECTS

AI Data Pipeline for Transactional Analytics

- Developed a scalable **Python** data pipeline on **AWS** to ingest and process high-volume transactional data, preparing it for AI model training.
- Implemented data quality checks and transformations using **pandas** and **SQL**, ensuring the reliability of datasets for analytical workloads.
- Designed the pipeline architecture for reusability, enabling faster onboarding of new AI use cases by providing standardized feature sets.

Enterprise System Integration with REST APIs

- Built and deployed **Java Spring Boot** REST APIs to facilitate data exchange between disparate enterprise systems, including ERP modules and operational platforms.
- Integrated services using **Hibernate** and **PostgreSQL**, ensuring robust data persistence and retrieval for critical business functions.
- Managed API versioning and documentation, enabling seamless integration for internal and external stakeholders across multiple system updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
