PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed a team of 4 test consultants, gathering business requirements from stakeholders to verify and prioritize functional specifications for a new payment processing system.
- Developed and executed comprehensive test cases based on business and functional requirements, ensuring thorough testing of new features within the payments ecosystem.
- Collaborated closely with client technical architects and developers to translate complex business requirements into detailed functional specifications for the POS integration team.
- Reviewed test cases written by junior analysts, ensuring all requirements were adequately covered and providing constructive feedback for improvement.
- Re-tested and verified bug fixes for critical payment gateway issues, confirming successful resolution before release and maintaining application integrity.
- Mentored less experienced analysts in test case design and execution best practices, fostering knowledge transfer and team development initiatives.
- Containerized the payment processing application using **Docker** and deployed to an **AWS** environment, enabling more efficient testing cycles and environment management.

SKILLS

Testing Methodologies – Functional Testing, Non-functional Testing, API Testing, Test Planning, Test Estimation, Regression Testing, UAT

Fintech & Payments – POS Systems, Payment Processing, Transaction Monitoring, Reconciliation Workflows

API & Services – REST APIs, Postman, Swagger, API Testing Tools

Programming & Scripting – Python, Java, SQL

Cloud & DevOps – AWS, Docker, Jenkins, Git

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Oracle, PostgreSQL, MySQL

PROJECTS

Payment Gateway Integration & Testing (HCL Technologies)

- Designed and executed end-to-end test plans for integrating a new payment gateway into an existing enterprise financial services dashboard, covering API interactions and transaction flows.
- Developed automated API test scripts using **Python** and **Postman** to validate request/response payloads and error handling for over 150 payment processing endpoints.
- Performed functional and non-functional testing across multiple environments, identifying and documenting defects with high attention to detail to ensure data integrity and system reliability.

POS Transaction Monitoring Dashboard (HCL Technologies)

- Contributed to the development of a **Java Spring Boot**-based dashboard for monitoring point-of-sale transactions, focusing on operational alerting for failed payments.
- Wrote **SQL** queries against **PostgreSQL** to extract and validate transaction data for reporting and reconciliation workflows, supporting operational teams.
- Collaborated with business analysts to refine requirements for real-time transaction status updates, ensuring clear communication of system behaviour.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
