HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** to handle core financial transaction processing, integrating with downstream services via REST APIs and message queues.
- Designed and implemented robust persistence layers using **Hibernate** and **JPA**, managing complex object-relational mappings for enterprise data models across PostgreSQL and Oracle databases.
- Authored comprehensive unit and integration tests for Java applications using **JUnit** and **Mockito**, achieving over **85% code coverage** and ensuring system stability.
- Collaborated with product managers and stakeholders to translate business requirements into technical specifications for new application features, contributing to sprint planning and estimation.
- Participated in code reviews for junior engineers, providing constructive feedback to maintain code quality and adherence to architectural standards within the team.
- Explored and integrated **AI tools** into the daily development workflow for tasks such as code completion and initial debugging, adhering to responsible AI usage guidelines.
- Containerised Java applications using **Docker** and deployed them to an **AWS EC2** environment, managing build pipelines with **Jenkins** for continuous integration and deployment.

SKILLS

Programming Languages – Java, Python, SQL, R, HTML, CSS, JavaScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum, CI/CD, Data Warehousing, ETL

PROJECTS

Enterprise Java Payments Processing System

- Engineered a **Java Spring Boot** application to manage high-volume financial transaction flows, processing approximately **5,000 transactions per hour**.
- Implemented core business logic using **JPA** for data persistence against a **PostgreSQL** database, ensuring data integrity for critical financial operations.
- Developed RESTful APIs for inter-service communication and integrated with an asynchronous messaging system for reliable event handling.

Customer Onboarding Analytics Dashboard

- Developed an interactive **Power BI** dashboard to visualize key metrics for customer onboarding success, tracking **15 distinct KPIs** for new enterprise clients.
- Extracted and transformed data using **Power Query** from multiple sources, performing data modeling to create a unified view for business stakeholders.
- Published reports and configured scheduled refreshes, providing daily insights into onboarding progress and identifying potential bottlenecks for a newly acquired customer segment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
