PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed proprietary datasets to evaluate their predictive power for key performance indicators of publicly listed companies, identifying **alpha** signals.
- Developed and maintained automated client reports using **Python** and **SQL**, ensuring timely delivery of data insights and supporting frequent reporting cycles.
- Interpreted complex and obscure datasets, applying a curious and questioning mindset to uncover underlying trends and relationships relevant to target businesses.
- Translated technical analysis findings and methodologies into clear, actionable insights for non-technical audiences, including client teams and business stakeholders.
- Explored and integrated experimental **AI** and **LLM** tools into analytical workflows to enhance data processing and predictive modelling capabilities.
- Managed data analysis tasks with a high degree of ownership and self-accountability, ensuring accurate and reliable delivery of project outcomes.
- Collaborated with a team of data analysts to refine analytical methodologies and contribute to a collegial, professional, and fast-paced work environment.

SKILLS

Programming Languages – Python, SQL, R

Data Analysis & BI Tools – Power BI, Tableau, Pandas, NumPy, Scikit-learn

Databases & Warehousing – Snowflake, PostgreSQL, MySQL, Oracle

AI & LLM Tools – AI, LLM

Methodologies – Statistical Modelling, A/B Testing, Data Modelling, ETL

Financial Literacy – Financial Accounts, KPI Analysis, Investment Data

PROJECTS

Proprietary Dataset Alpha Testing Framework

- Designed and implemented a Python-based framework to systematically analyze large, obscure datasets for predictive signals against target company KPIs.
- Integrated **SQL** queries for efficient data extraction and transformation from cloud data warehouses, focusing on preparing data for statistical analysis.
- Developed automated reporting modules using **Power BI** to visualize identified 'alpha' and present findings to internal stakeholders for review.

Client Data Integration & Reporting Automation

- Built automated data pipelines in **Python** to ingest and process diverse alternative datasets for client consumption, handling ~3,500 events per hour.
- Developed interactive **Tableau** dashboards to present key findings and trends from the processed data, enabling clients to understand investment-grade intelligence.
- Collaborated with client-facing teams to gather requirements for reporting, ensuring the delivered insights directly addressed their analytical needs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
