PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python**-based ETL pipelines to ingest and transform data from multiple sources into a centralized data warehouse, processing approximately **50 GB** of data daily.
- Developed and maintained **Java Spring Boot** applications, building robust **REST APIs** for inter-service communication and handling over **2,000 requests per minute** during peak hours.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace** for monitoring and incident response, consistently meeting **SLA targets** for P1/P2 incidents.
- Collaborated with business stakeholders to gather requirements for new application features, translating them into technical specifications and user stories within an **Agile/Scrum** framework.
- Wrote and executed comprehensive unit and integration tests for **Python** and **Java** codebases using **pytest** and **JUnit**, achieving over **85% code coverage** for critical modules.
- Contributed to the deployment and maintenance of applications on **AWS**, including managing **EC2** instances, **S3** buckets, and configuring **CloudWatch** alerts.
- Participated in code reviews, providing constructive feedback to peers to ensure code quality and adherence to best practices, contributing to a **15% reduction** in post-deployment defects.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud – AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – Git, Jenkins, Docker, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Python Data Pipeline for Financial Reporting

- Engineered a **Python** data pipeline using **pandas** to extract, transform, and load financial transaction data from disparate sources into a PostgreSQL database.
- Automated the generation of weekly operational reports by processing approximately **30 GB** of historical data, reducing manual effort by an estimated **10 hours** per week.
- Implemented data validation checks to ensure the accuracy and integrity of the loaded data, catching over **95%** of data quality issues before reporting.

Java-based Transaction Monitoring Service

- Developed a **Java Spring Boot** microservice to monitor real-time transaction flows, identifying and alerting on potential anomalies and processing errors.
- Integrated with an existing enterprise messaging queue to consume transaction data, handling up to **1,500 messages per second**.
- Designed and implemented RESTful APIs for querying transaction statuses and generating audit trails, supporting operational teams in their reconciliation workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
