PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts for data extraction and transformation, automating weekly operational reports for a financial-services client and reducing manual effort by approximately **6 hours** per week.
- Developed and maintained **Java Spring Boot** REST APIs supporting internal business systems, handling request validation and cross-service data exchange for a core enterprise platform.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, performing root cause analysis and implementing fixes within strict SLA parameters for P1 and P2 issues.
- Collaborated with cross-functional teams to gather requirements for enhancements to enterprise business systems, participating in Agile ceremonies and coordinating user acceptance testing.
- Supported and integrated with enterprise resource planning (ERP) modules and other operational platforms, managing change control processes for system configuration updates.
- Containerised multiple **Java** microservices using **Docker**, facilitating consistent deployment environments across development and staging, and reducing environment-setup time by **40%**.
- Analyzed fire growth, means of escape, structural fire resistance, and smoke control using computer modelling software like **Computational Fluid Dynamics** for new and existing building projects.

SKILLS

Engineering Analysis – Fire Engineering Analysis, Computational Fluid Dynamics, Risk Analysis, Process Safety

Software Development – Java, Spring Boot, Python, Docker, REST APIs, SQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux, Shell Scripting

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

Project Management & Support – Agile, Scrum, Jira, Confluence, Jenkins, CI/CD, Incident Response, Change Management

PROJECTS

Building Safety Analysis Suite (HCL Technologies)

- Developed a suite of analytical tools in **Python** to process building design parameters and simulate fire spread scenarios, aiding in the assessment of safety compliance for enterprise clients.
- Integrated simulation outputs into a structured reporting framework, generating technical summaries and visualisations of critical safety metrics for client review.
- Refactored existing manual calculation processes into automated scripts, accelerating the analysis phase for an average of **5** projects per quarter.

Automated Reporting Pipeline for Operations (HCL Technologies)

- Engineered a **Python**-based ETL pipeline to aggregate transaction data from multiple databases (**PostgreSQL**, Oracle) and generate daily operational reports, replacing a manual process.
- Designed and implemented data validation checks within the pipeline to ensure accuracy, reducing data discrepancies in final reports by **30%**.
- Scheduled and monitored pipeline execution using cron jobs on **Linux**, ensuring timely delivery of reports critical for client operations.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
