# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and debugged **Java Spring Boot** microservices for enterprise applications, implementing robust REST APIs and handling data persistence with **Hibernate**.
- Authored **Python scripts** to automate ETL processes, transforming and loading data from various sources into analytical databases, reducing manual data preparation time by approximately **40%**.
- Designed and implemented a **FastAPI** service in Python for secure API gateway functionality, integrating with internal authentication systems and routing requests to downstream microservices.
- Wrote secure and high-quality code in **Python** and **Java**, adhering to coding standards and best practices for developing secure software solutions.
- Analyzed and correlated **incident data** using enterprise-authorized AI capabilities to identify, interpret, and summarize threat probabilities and impacts, contributing to vulnerability assessment reports.
- Applied reuse-first, **AI-assisted practices** within the SDLC to strengthen security testing and control validation, ensuring traceability and alignment to resiliency expectations.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing infrastructure configurations and ensuring application availability.

## SKILLS

**Languages** – Java, Python, SQL, R, Bash

**Frameworks & Libraries** – Spring Boot, Hibernate, JPA, FastAPI, Flask, pandas, NumPy, scikit-learn

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

**Databases** – PostgreSQL, MySQL, Oracle

**Tools & Platforms** – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

**Security & AI** – AI Agent Development, Information Security, IT Risk Management, Vulnerability Assessment, SDLC, CI/CD, Application Resiliency

## PROJECTS

### Enterprise Java Security Enhancement Project

- Developed a **Java Spring Boot** module to integrate with an enterprise security framework, adding new authentication and authorization layers to existing services.
- Implemented threat analysis routines using **Python** and provided secure data handling for sensitive information, reducing potential attack vectors by an estimated **15%**.
- Wrote comprehensive unit tests using **JUnit** and integrated the module into the CI/CD pipeline for automated testing and deployment.

### AI-Assisted Security Vulnerability Scanner

- Built a **Python** application that integrates with enterprise-authorized AI tools to analyze code for potential security vulnerabilities, generating preliminary reports.
- Developed a data processing pipeline to aggregate and format findings from AI analysis and static code analysis tools, preparing data for human review.
- Designed the application's architecture to ensure sensitive data was handled according to security protocols and generated audit trails for all analysis performed.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
