PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for enterprise Java applications, responding to P1/P2 incidents and ensuring SLA adherence for critical financial services dashboards.
- Developed Python scripts to automate data extraction and transformation tasks for scheduled financial reporting, processing approximately 500GB of data weekly.
- Executed ad-hoc SQL queries and performed data validation across PostgreSQL and Oracle databases for business intelligence reporting and system integration tasks.
- Designed and implemented REST APIs using Java Spring Boot for cross-service communication, facilitating data exchange between core banking systems and operational platforms.
- Contributed to change-control management for enterprise business systems, coordinating User Acceptance Testing and providing post-go-live support for system configuration updates.
- Containerized Java Spring Boot applications using Docker and deployed them to AWS EC2 instances, integrating with Jenkins for automated build and deployment pipelines.
- Analyzed application logs using Splunk and Dynatrace to identify root causes of performance degradation, reducing mean time to resolution by 15% for recurring issues.

SKILLS

Programming Languages – Java, Python, SQL, R.

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn.

Databases – PostgreSQL, MySQL, Oracle.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query.

Enterprise Systems – ERP, Financial Control, Operations Finance, Financial Planning & Analysis.

Methodologies – Agile, Scrum.

PROJECTS

Financial Operations Dashboard Enhancement

- Developed Python ETL scripts to ingest and transform transaction data from multiple sources into a central PostgreSQL data warehouse for the financial operations dashboard.
- Built interactive Power BI dashboards to visualize key performance indicators and operational metrics for payment transaction flows, enabling faster identification of bottlenecks.
- Collaborated with business analysts to gather requirements for new dashboard features, supporting User Acceptance Testing and iterating based on stakeholder feedback.

Automated Financial Reporting System

- Engineered a Python-based reporting tool that automatically generated weekly financial summaries by querying Oracle and MySQL databases and formatting output into PDF reports.
- Implemented robust error handling and logging mechanisms within the Python scripts, improving system reliability and reducing manual intervention by 40%.
- Integrated the reporting system with an existing CI/CD pipeline using Jenkins, ensuring consistent and timely report generation according to predefined schedules.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
