PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed financial statements and performance trends for 165+ investments across industries including technology, healthcare, and industrials, identifying key performance indicators and potential risks.
- Developed financial models to support asset valuation and strategic optimization initiatives for a diverse portfolio of corporate credit investments.
- Conducted in-depth evaluations of company financials, applying advanced analytical methodologies to assess trends and inform investment decisions.
- Managed and monitored a portfolio of 165+ investments across Europe, the U.S., and APAC, ensuring disciplined risk management and long-term value creation.
- Collaborated with cross-functional teams to gather requirements and provide operational insights for financial reporting enhancements.
- Supported change-control management for system configuration updates and coordinated User Acceptance Testing (UAT) for enterprise business systems.
- Containerized Java Spring Boot microservices using **Docker** and deployed to **AWS EC2** instances, ensuring efficient resource utilization and scalability.

SKILLS

Core Finance – Financial Analysis, Performance Analytics, Asset Valuation, Financial Modelling, Risk Management, Corporate Finance, Commercial Awareness, Financial Statements, Valuation Methodologies, Corporate Structures

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum

PROJECTS

Portfolio Performance Analytics Dashboard

- Developed a **Power BI** dashboard to visualize financial performance metrics and trends for a portfolio of 165+ investments, enabling quicker identification of underperforming assets.
- Engineered **Python** scripts to automate the extraction and transformation of financial data from various sources, reducing manual data processing time by approximately 30%.
- Designed **DAX** measures and data models within Power BI to support in-depth analysis of key performance indicators and investment strategies.

Credit Investment Risk Assessment Tool

- Built a **Java Spring Boot** application to automate the initial risk assessment of new credit investment opportunities, integrating with internal financial data repositories.
- Implemented REST APIs for seamless data exchange between the risk assessment tool and existing enterprise systems, facilitating a more holistic view of potential investments.
- Wrote comprehensive unit tests using **JUnit** to ensure the reliability and accuracy of the application's financial calculation modules.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
