PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained Java Spring Boot REST APIs for internal services, managing request validation and response transformations for ~1,500 daily API calls.
- Engineered Python scripts to automate ETL processes for daily reporting, consolidating data from PostgreSQL and MySQL into a central data warehouse, reducing manual processing time by 6 hours per week.
- Managed production support for enterprise financial-services applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**, meeting SLA targets for critical systems.
- Designed and implemented **trade execution logic** within a simulated trading environment, incorporating real-time market data feeds and order management principles.
- Conducted **market analysis** using historical data and statistical methods, identifying potential trading opportunities and assessing risk parameters for various asset classes.
- Developed **risk management strategies** and position sizing models, applying concepts of capital preservation and loss limitation to simulated trading scenarios.
- Containerized Python-based data processing services using **Docker** and deployed them to an **AWS EC2** environment, ensuring consistent execution across development and production.

SKILLS

Programming Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query

Financial Markets – Market Analysis, Risk Management, Trade Execution, Strategy Development, Backtesting

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Linux, Shell Scripting

PROJECTS

Simulated Trading Platform with Risk Management

- Developed a Python-based simulation engine to model daily trading activities, processing ~5,000 simulated trades per session.
- Implemented **strategy development** and **backtesting** modules using historical market data, enabling evaluation of algorithmic trading approaches.
- Integrated **risk management** controls, including stop-loss triggers and position sizing calculations, to simulate capital preservation strategies.

Financial Data Analysis and Dashboarding

- Extracted and transformed financial transaction data from PostgreSQL using SQL and Python (pandas) for analytical purposes.
- Built interactive **Power BI dashboards** to visualize key performance indicators and market trends for simulated trading performance.
- Applied statistical analysis techniques using R to identify correlations and patterns in market data for potential strategy refinement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
