HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed Python scripts to automate operational tasks including system provisioning and incident response, reducing manual effort by **40%**.
- Monitored system performance using **Splunk** and **Dynatrace**, establishing critical alerts for rapid incident detection and reducing Mean Time to Respond (MTTR) by **15%**.
- Analyzed logs, traces, and metrics across distributed systems to identify performance bottlenecks and optimize system performance, leading to a **22%** reduction in error rates.
- Defined and monitored Service Level Indicators (SLIs) and Service Level Objectives (SLOs) for critical platforms, ensuring high availability and reliability.
- Managed error budgets in collaboration with development teams to balance innovation speed with system reliability and stability.
- Collaborated with development teams to enhance service performance, streamline software delivery, and improve release processes for key business solutions.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, facilitating more consistent and reliable application rollouts.

SKILLS

Programming Languages – Python, Java, Bash

Operating Systems – Linux, Unix

Cloud Platforms – AWS, GCP, Azure

Monitoring & Observability – Prometheus, Grafana, Splunk, Dynatrace, CloudWatch

CI/CD & Automation – Jenkins, Ansible, Terraform

Networking – TCP/IP

Containerization – Docker

PROJECTS

Production Incident Response Automation (HCL Technologies)

- Automated P1/P2 incident response workflows for enterprise Java/.NET applications using Python scripting and shell scripts on Linux.
- Integrated **Splunk** log analysis with automated alerting mechanisms to reduce diagnostic time for critical production issues by an average of **30%**.
- Developed comprehensive runbooks and documentation for common incident scenarios, enabling faster triage and resolution by operations teams.

Scalable Infrastructure Monitoring with Prometheus & Grafana (MSc Project)

- Designed and implemented a monitoring solution for a distributed application using **Prometheus** for metrics collection and **Grafana** for visualization.
- Configured exporters and alert rules to monitor key performance indicators (KPIs) and system health, achieving a **90%** detection rate for simulated failures.
- Analyzed time-series data to identify performance trends and potential scaling bottlenecks, providing actionable insights for system optimization.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
