HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production environments for enterprise financial-services applications, ensuring **SLA adherence** and responding to P1/P2 incidents using **Splunk** and **Dynatrace**.
- Developed **Python scripts** to automate ETL processes and generate scheduled reports, improving data delivery efficiency for operational teams.
- Designed and implemented **REST APIs** using **Java Spring Boot** for cross-service communication, enhancing modularity and maintainability of existing applications.
- Supported and integrated with enterprise business systems, coordinating **change-control management** for configuration updates and UAT across interconnected platforms.
- Analyzed system availability, latency, and overall health for production services, providing feedback loops to development teams on operational gaps.
- Practiced sustainable incident response and conducted **blameless postmortems**, focusing on optimizing mean time to recover across the technology stack.
- Containerized applications using **Docker** and managed deployments within **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Methodologies – Agile, Scrum, Incident Management, Change Management

Tools – Jira, Confluence, Power BI, Tableau, R/RStudio

PROJECTS

Automated Transaction Reconciliation System

- Developed a **Python-based** system to automate reconciliation workflows between disparate financial data sources, reducing manual effort by approximately **30%**.
- Implemented data validation checks and error handling using **pandas** and **SQL** against **PostgreSQL**, ensuring data integrity for critical financial operations.
- Designed and deployed the application on **AWS Lambda**, integrating with **S3** for data ingestion and enabling event-driven processing of transaction files.

Production Incident Triage Dashboard

- Engineered a dashboard using **Power BI** to visualize real-time production system health and incident metrics from **Splunk** logs.
- Developed **DAX measures** and complex data models to track key performance indicators such as incident resolution times and alert frequency for critical financial services.
- Collaborated with operations teams to gather requirements and refine the dashboard's reporting capabilities, improving visibility into system stability for **stakeholders**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
