HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed Python scripts for automating network event remediation, reducing manual intervention time by approximately **30%**.
- Designed and implemented optimized network monitoring systems using **Splunk** and **CloudWatch**, enhancing visibility into production network performance.
- Analyzed network traffic data and logs to diagnose and identify root causes of issues within large-scale data center environments.
- Contributed to the design and deployment of new network architectures, ensuring adherence to scalability and reliability requirements.
- Participated in deep technical discussions regarding network infrastructure engineering and multi-vendor network management.
- Wrote and maintained shell scripts for log analysis and system administration tasks on **Linux** servers.
- Containerized network automation tools using **Docker**, facilitating consistent deployment across development and production environments.

SKILLS

Networking – TCP/IP, Network Fundamentals, Switching, Routing, BGP, OSPF, ISIS, MPLS, GRE, IPnIP

Programming – Python, Golang, Rust, C++, Java, Spring Boot

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Operating Systems – UNIX, Linux

Databases – PostgreSQL, MySQL, Oracle

Monitoring & Automation – Splunk, Dynatrace, Jenkins, Git, Shell Scripting

PROJECTS

Automated Network Incident Response System

- Developed a Python-based automation suite to automatically detect, diagnose, and remediate common network incidents, reducing average resolution time by **40%**.
- Integrated monitoring alerts from **Dynatrace** and **Splunk** to trigger automated response workflows, handling approximately **150** alerts daily.
- Designed and implemented data parsing logic to extract relevant information from network device logs for root cause analysis.

Data Center Network Performance Monitoring Enhancement

- Engineered Python scripts to collect and process network performance metrics from multi-vendor devices within data center environments.
- Built custom dashboards in **Power BI** to visualize network latency, packet loss, and throughput, providing actionable insights to infrastructure teams.
- Collaborated with operations teams to define key performance indicators (KPIs) and reporting requirements for network stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
