PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Oversaw daily client trading activities, ensuring adherence to deadlines for fund order processing, including subscriptions and redemptions for an enterprise client.
- Reviewed and validated trade documentation for accuracy and compliance with client and fund operational requirements, managing trade settlement activities and resolving exceptions.
- Partnered with clients, investment managers, and internal teams to deliver high-quality service, coordinating fund order processing and managing operational queries.
- Developed Python scripts to automate aspects of transaction reconciliation workflows and generate scheduled reports for financial operations teams, improving data accuracy.
- Managed production support for enterprise Java/.NET applications, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**.
- Contributed to change-control management for system configuration updates and coordinated User Acceptance Testing (UAT) across interconnected enterprise business systems.
- Containerised Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2** instances, enabling streamlined application updates.

SKILLS

Core Operations – Fund Order Processing, Subscriptions, Redemptions, Transfers, Capital Commitments, Trade Settlement, Investor Trading Activity, Operational Controls, AML/KYC Due Diligence

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases & Cloud – PostgreSQL, MySQL, Oracle, AWS (EC2, S3, Lambda, CloudWatch)

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

Methodologies – Agile, Scrum, Change Management

PROJECTS

Financial Operations Dashboard Enhancement (HCL Technologies)

- Developed automated Python data pipelines to ingest and transform transaction data from multiple sources for an enterprise financial operations dashboard.
- Implemented enhancements to the dashboard's transaction monitoring and alerting features using Java Spring Boot, improving visibility into failed payment messages for a financial services client.
- Wrote **SQL** queries against **PostgreSQL** databases to validate data integrity and support ad-hoc reporting requests from operations teams.

Client Service Automation Platform (HCL Technologies)

- Built a REST API using **Java Spring Boot** to integrate with client-facing systems, facilitating automated data exchange for service requests.
- Designed and implemented a **Jira** integration module to streamline defect tracking and resolution workflows between development and client operations teams.
- Collaborated with business analysts to gather requirements for operational efficiency improvements, translating them into technical specifications for new platform features.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
